| Summary

Senior DevOps Engineer with 11+ years of experience spanning from system administration to leading complex multi-cloud infrastructure projects. Currently at JFrog (post-Qwak acquisition), focusing on security hardening and SSDLC implementation. Additionally providing freelance DevOps consulting for early-stage startups through FastCTO platform since 2022.

Proven track record of dramatic efficiency improvements: reduced deployment time from weeks to days, optimized Terraform configurations by 93%, and led successful Kubernetes migrations. Helped 15+ startups rapidly launch to production. Expertise in multi-cloud environments (AWS, GCP, Azure), Infrastructure as Code, and building scalable automation solutions. Passionate about eliminating manual processes and enabling development teams through robust DevOps practices.

| Skills

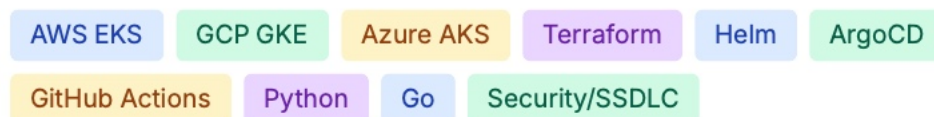

| Experience

● DevOps Engineer Jun 2024 - Present

JFrog (acquired Qwak)

After Qwak acquisition by JFrog, transitioned to focus on security and cloud infrastructure integration.

- > Led security hardening initiatives across infrastructure (SSDLC implementation)
- > Aligned infrastructure with JFrog security standards and compliance requirements
- > Transformed development approach through security-first practices
- > Participated in JFrog cloud integration and migration processes
- > Implemented comprehensive security checks and vulnerability remediation
- > Maintained production stability during organizational transition

Freelance DevOps Consultant (Part-time)

2022 - Present

FastCTO Platform

Providing rapid DevOps consulting for early-stage startups (pre-seed/seed rounds) through FastCTO platform.

- > Helped 15+ startups launch to production, typically within days
- > Rapid CI/CD pipeline setup from scratch using GitHub Actions
- > Multi-environment infrastructure (dev/staging/prod) configuration
- > Cloud infrastructure setup and cost optimization for MVPs
- > APM and monitoring setup (Datadog, Google Cloud Operations)
- > Google App Engine deployments with Cloud SQL integration
- > AWS deployments using EKS, Elastic Beanstalk, and RDS

GCP

Google App Engine

AWS EKS

Elastic Beanstalk

Terraform

PostgreSQL

Cloud SQL

Node.js

Senior DevOps Engineer

Mar 2023 - Jun 2024

Qwak (ML Platform)

Managed multi-cloud infrastructure for ML platform serving 40-50+ customer clusters at peak.

- > **Terraform Optimization:** Reduced environment configuration from 1500 to 100 lines using functions and overrides
- > **Bootstrap Time:** Decreased new environment provisioning from 1 week to 1 day
- > **Change Management:** Reduced infrastructure change time from 4 hours to 15-20 minutes
- > Developed custom spot instance exporter in Go - enabled differentiation between platform issues and cloud provider spot terminations
- > Migrated from Prometheus to VictoriaMetrics, drastically reducing resource consumption
- > Migrated product dashboards to VictoriaMetrics stack
- > Developed first GCP infrastructure prototype (joined when AWS was established)
- > Collaborated closely with development teams on Helm charts and deployment strategies
- > Maintained multi-cloud infrastructure (AWS, GCP, Azure) from inception

AWS EKS

GCP GKE

Azure AKS

Lead DevOps

Jun 2022 - Oct 2022

Tonic Health

Led a DevOps team of 5 engineers, responsible for planning sprints, facilitating retrospectives, and driving automation development.

- > Led DevOps automation development process
- > Created principal schemes and tested future solutions
- > Implemented security requirements in code
- > Improved internal deployment framework
- > Collaborated closely with developers for fast production shipping

Senior DevOps Engineer

Feb 2022 - Jun 2022

AllStarsIT

Worked on an eCommerce Platform from Israel, creating automation for the internal platform system.

- > Automated the whole process from commits to production delivery
- > Built database promotion automation with AWS RDS and Jenkins
- > Created onboarding scripts for internal use

AWS

Kubernetes

Helm

Terraform

ArgoCD

Jenkins

Senior DevOps Engineer

Feb 2018 - Jan 2022

Tonic Health / SCI Solutions / R1 RCM

Promoted to Senior DevOps Engineer position with expanded responsibilities.

- > **2018:** Decreased time-to-market from 2 weeks to 2 days per microservice
- > **2019:** Implemented Kubernetes for cost optimization
- > **2020:** Completed full migration to Kubernetes
- > Created Terraform modules and Helm charts for projects
- > Maintained GlusterFS, RabbitMQ, Elasticsearch, Redis clusters

AWS

Kubernetes

Terraform

Jenkins/Groovy

Ansible

DevOps Engineer

Nov 2016 - Feb 2018

Tonic Health

Started as a middle DevOps Engineer in a startup with flat organization.

- > Developed onboarding process that reduced manual actions by 80%
- > Stabilized backup system
- > Wrote Ansible playbooks and roles for CI/CD process

AWS

Ansible

Jenkins

Docker

Consul

Vault

● Duty System Administrator / DevOps Engineer

UvoCorp

Aug 2015 - Oct 2016

Duty engineer maintaining a platform for writers and customers.

- > Decreased server setup time by 50% through Puppet improvements
- > Reduced debugging time by 50%
- > Rewrote shell scripts in Ruby for Puppet Server

Puppet

Linux

MySQL

KVM

Ruby

● System Engineer

EFSOL

Apr 2013 - Aug 2015

Delivered RDP solutions and Microsoft services for clients.

- > Successfully integrated 20+ companies from scratch in 2 years
- > Handled full lifecycle: requirements, planning, implementation, support

Windows Server

Active Directory

MS SQL

Hyper-V

Terminal Services
